HOW TO CORRECT BENT PVC MINIATURES

Bent miniatures BEFORE Hot Water Treatment.

Use a pair of Tongs, and Mug or Bowl to heat up water with.

Bent miniatures AFTER Hot Water Treatment.

Microwave, or boil the Water until it’s Near boiling temperatures.

Using Tongs, pick up bent Miniature.

Dunk the Bent miniature into the nearly boiling hot water.

Let the miniature sit in the Hot water for about 30 seconds. It will become pliable.

Position bent portions until correct. Then dunk in Ice cold water. Let dry on towel.

(Repeat process as needed for VERY bent miniatures)
